WORK EXPERIENCE

Chorus.ai // PRODUCT DESIGNER - MOBILE

Oct 2019 - Present

Designing for conversation intelligence AI and currently leading iOS and Android design for the new on-the-go experience (64% of all Chorus users).

Led the revamp of our design system across web and mobile platforms to ensure a consistent experience across platform redesign efforts.

Designed new web homepage experience to improve feature discovery and drive value to relevant areas of the product.

Dynamic Signal // PRODUCT DESIGNER

June 2017 - Sept 2019

Designed on iOS, Android, and Web for employees in distributed workforces. Large projects I've worked on include:

- A completely redesigned mobile experience for employee communications. We took apart the product, reverted to native principles, assessed usage and engagement, balancing user and business needs.
- User research detailing a vision and workflows for employee communications.
- New engagement features — live streaming, polls, user directory, member-to-member messaging, bookmarking content, sharing content.

Lightspeed Venture Partners // SUMMER FELLOW

June 2016 - Sept 2016

The Lightspeed Fellowship gives young entrepreneurs the resources, guidance, and connections to build on an idea in a 12-week program. Our team of 4 built a solution for the agriculture industry, called Agrity.

With Agrity, I led design of a web app to increase productivity and efficiency of business deals in the agricultural-trade business.

Localwise // UX/UI INTERN

Jan 2016 - May 2016

Designed mobile user onboarding flows for job seekers and small businesses, achieving an 8% conversion lift.

EDUCATION

University of California, Berkeley // B.A. Cognitive Science, Computer Science

Graduated in Dec. 2016
